This collection is available at The State Historical Society of Missouri. If you would like more information, please contact us at shsresearch@umsystem.edu.

**Introduction**

Log books and maps from U.S. Corps of Engineers survey of the Missouri River, 1870s-1890s. Log books include observations of topography, hand drawn maps, and notes documenting the journeys and dredging operations along the river. The bulk of the collection relates to the upper Missouri River.
