These are district clerk’s records and teacher’s class records for the rural Morning Shade School (District No. 18 and 35) in Ste. Genevieve County, Missouri. The collection includes nine volumes that contain minutes of annual meetings, school censuses, financial data, and teachers’ contracts.

Morning Shade School was located near River Aux Vases. The district clerk was required by state law to keep records of the annual meetings of the district’s voters, meetings of the district’s directors, enumeration of school-age youth, district funds, teachers’ contracts, teachers’ term reports, and other prescribed data, in a designated record book. Teachers also were required to keep a record of courses taught, textbooks used, enrollment, attendance, grades, the condition of the schoolhouse, and other information. Until the advent of large-scale consolidation of districts after World War II small districts like this were the backbone of rural public education in Missouri.

The identification number assigned to Morning Shade School changed from 18 to 35 about 1924.
