S0336 Black History Photograph Collection 1895-1983
665 Photographs

This collection is available at The State Historical Society of Missouri. If you would like more information, please contact us at shsresearch@umsystem.edu.

The photographs in this collection are in addition to those in collection S0201. These photographs were collected as part of the original project. The UMSL Black History Project was created by the Western Historical Manuscript Collection through donations of material by the African-American community of St. Louis from 1978-1985.

Irene Cortinovis, associate director of WHMC-St. Louis received funding from the National Historical Publications and Records Commission and the Monsanto Company in February 1980 for a one year project entitled "Sources of Black History in St. Louis City and County." The project identified and collected records, correspondence, photographs and publications documenting the history of blacks in St. Louis. It surveyed historical source material held by black organizations and individuals and acquired or copied these collections for retention at WHMC-St. Louis. It also taped interviews with black St. Louisans who played significant roles in the history and development of the city and county.

This collection does not contain prints of every negative.
