INTRODUCTION
Papers presented at symposium on women and media, intra-family communication, women and networking, and women, work, and technology.

DONOR INFORMATION
The papers were donated to the University of Missouri by Jean Gaddy Wilson on 20 September 1988 (Accession No. 4883).

ORGANIZATIONAL SKETCH
The International Group for the Study of Women was established in the spring of 1977 in order to promote interdisciplinary and scholarly research on the state of contemporary women. Founded upon the conviction that a balanced and thorough study of the problems related to women must be approached from the widest perspective possible, the group sought to promote cross-cultural research and the exchange of information between Japan and other countries.
