HISTORY

The collection reflects a wide range of issues concerning nuclear technology and radioactive waste sites connected to Mallinckrodt Chemical Works. Mallinckrodt developed a chemical process that lead to the first nuclear chain reaction in 1942 and until 1966 processed uranium for nuclear weapons at plants in downtown St. Louis and Weldon Springs. The company dumped radioactive wastes at sites in St. Louis County.

SCOPE AND CONTENT

The Mallinckrodt collection consists of reports, files and correspondence accumulated by Kay Drey in the course of her work as an anti-nuclear activist.
